WE DO PRODUCT TAKE-OFFS

We're here to Help! We provide customers with fast and accurate drawing take-offs. Whether it is for Euramax Gutter Systems, Yardcrafters Vinyl Railing, or DrySnap under deck drainage products, our Customer Service department is your source for Free take offs

free

LIGHTS OUT!

Like most companies today, energy consumption is a big issue. Euramax Canada is doing it's part to reduce our environmental footprint by limiting our use of water and electricity. Our factory in Barrie, Ontario has installed motion sensors on all light switches to turn light off when not needed. Our water consumption is also down due to motion sensor flush valves on toilets. Also new this year, our brochures are now printed with 25% recycled material.

YARDCRAFTERS™ T-RAIL

New this year is the T-Rail. This is a great option for customers seeking that 'Beefy' looking rail to complement their home. Like all of our Vinyl Railing products, this comes with a lifetime warranty! Call our Customer Service department for more information on this product.

INSTALL SNOW GUARDS BEFORE THE COLD WEATHER COMES!

Do any of your customers have steel roofs? We offer a wide variety of snow guards at all price levels. The economical acrylic brackets (shown below) fasten directly to the surface of the roof using Surebond™ 190 Adhesive. This creates a permanent leak-proof installation. We also offer a large variety of snow retention products for other roof types such as slate, tile, shakes and even commercial applications.

CANADIAN TRIVIA

Canada is the only foreign country that is permitted to have an embassy on Pennsylvania Ave. in Washington, D.C.

The fortification walls around Quebec City were first constructed in 1695. Quebec City is the oldest walled city north of Mexico.
